

Where passion comes to bloom

FREESIA

CATALOGUE

VAN DEN BOS
freesia

Single flowers

Growing together!

To make the best out of your freesia flower production, we must do it together! Our love for the beautiful shape, fragrances and colors of the freesia's has no boundaries. Combined with the passion of growing corms, is what drives us year by year!

In 2022, we are proud that we combine our assortment with the assortment of Penning Freesia. With adding these varieties, we can give you a full spectrum of Traditional and Unique Colors. These 75 varieties are selected for different periods in the year, different destinations, and different growing locations. With this wide spectrum of beautiful varieties, we are able to give you year-round the requested colors.

Because of our innovative mentality, we face the future with confidence. This completely update freesia catalogue provides all the proof you need. With our regional specialists who understand the cultivation conditions and market opportunities in your country, you can count on a good advice. We wish you all the very best in the coming growing season!

Next to this cut freesia assortment, we are also proud to mention that we have a genetic short potfreesia collection. For more information about these varieties please check www.vandenbos.com.

Van den Bos Flowerbulbs - Where passion comes to bloom!

- High production
- Lovely perfumed
- Full colour range
